Appendix B - Addendum

Ref: 18/6355/FUL
Land West of Beechwood Avenue, London, N3 3BA

1 further response has been received following the publication of the committee report. The objection can be summarised as follows:

- Accepted the incorrect methodology of the parking assessment. There is very little point measuring the parking for the whole of Beechwood Avenue. The immediate surrounding parts should be considered.
- The design does not consider that the site abuts the busy A406. The large ground windows are designed for permeability. However, as the noise dust and traffic shoot past they will stay closed and curtained. My largest concern is this façade will attract graffiti.
- Site exceed recommended units per hectare.

Condition 31 is amended as follows:
"The approved Classes A1 and B1 shall only be used between the hours 07:00 – 22:00.

Reason: To protect the amenity of the area in accordance with Policies DM01 and DM04 of the Barnet Development Management Policies (adopted September 2012).

The following conditions are proposed in addition to those recommended within the committee report. These conditions have been proposed by the Council's Environmental Health service and relate to noise, air quality and pollution.

36. a) Before development commences, a scheme of proposed air pollution mitigation measures shall be submitted to and approved in writing by the Local Planning Authority.

b) The approved mitigation scheme shall be implemented in its entirety in accordance with details approved under this condition before any of the development is first occupied or the use commences and retained as such thereafter.

Reason: To ensure that the amenities of occupiers are protected from the poor air quality in the vicinity in accordance with Policy DM04 of the Development Management Policies DPD (adopted September 2012), the Sustainable Design and Construction SPD (adopted October 2016) and Policy 5.3 of the London Plan 2016

36. a) A scheme of offset measures based on the findings of the report by Air Quality Consultants shall be submitted to and approved by the Local Planning Authority prior to development.

b) The approved measures shall be implemented in its entirety in accordance with details approved under this condition before any of the development is first occupied or the use commences and retained as such thereafter.
37. Prior to installation, details of the boilers shall be forwarded to the Local Planning Authority for approval. The boilers shall have dry NOx emissions not exceeding 40 mg/kWh (0%).

Reason: To comply with the Mayor's London Plan SPG on Sustainable Design and Construction and Policy 7.14 of the Mayor's London Plan in relation to air quality.

38. a) No development shall take place until a scheme of proposed noise mitigation measures against externally generated traffic/mixed use noise has been submitted to and approved in writing by the Local Planning Authority.

b) The mitigation measures as approved under this condition shall be implemented in their entirety prior to the commencement of the use or the first occupation of the development and retained as such thereafter.

Reason: To ensure the amenities of occupiers are not prejudiced by traffic/mixed use noise in the immediate surroundings, in accordance with Policies DM04 of the Development Management Policies DPD (adopted September 2012), the Sustainable Design and Construction SPD (adopted April 2013), and 7.15 of The London Plan 2016.

39. The level of noise emitted from the plant hereby approved shall be at least 5dB(A) below the background level, as measured from any point 1 metre outside the window of any room of a neighbouring residential property.

If the noise emitted has a distinguishable, discrete continuous note (whine, hiss, screech, hum) and/or distinct impulse (bangs, clicks, clatters, thumps), then it shall be at least 10dB(A) below the background level, as measured from any point 1 metre outside the window of any room of a neighbouring residential property.

Reason: To ensure that the proposed development does not prejudice the amenities of occupiers of neighbouring properties in accordance with Policies DM04 of the Development Management Policies DPD (adopted September 2012) and 7.15 of the London Plan 2016.

40. Part 1

Before development commences other than for investigative work:

a) A desktop study (Preliminary Risk Assessment) shall be carried out which shall include the identification of previous uses, potential contaminants that might be expected, given those uses, and other relevant information. Using this information, a diagrammatical representation (Conceptual Model) for the site of all potential contaminant sources, pathways and receptors shall be produced. The desktop study (Preliminary Risk Assessment) and Conceptual Model shall be submitted to the Local Planning Authority. If the desktop study and Conceptual Model indicate no risk of
harm, development shall not commence until approved in writing by the Local Planning Authority.

b) If the desktop study and Conceptual Model indicate any risk of harm, a site investigation shall be designed for the site using information obtained from the desktop study and Conceptual Model. This shall be submitted to, and approved in writing by, the Local Planning Authority prior to that investigation being carried out on site. The investigation must be comprehensive enough to enable:

- a risk assessment to be undertaken,

- refinement of the Conceptual Model, and

- the development of a Method Statement detailing the remediation requirements.

The risk assessment and refined Conceptual Model shall be submitted, along with the site investigation report, to the Local Planning Authority.

c) If the risk assessment and refined Conceptual Model indicate any risk of harm, a Method Statement detailing the remediation requirements, using the information obtained from the site investigation, and also detailing any post remedial monitoring shall be submitted to, and approved in writing by, the Local Planning Authority prior to that remediation being carried out on site.

Part 2

d) Where remediation of contamination on the site is required completion of the remediation detailed in the method statement shall be carried out and a report that provides verification that the required works have been carried out, shall be submitted to, and approved in writing by the Local Planning Authority before the development is occupied.

Reason: To ensure the development can be implemented and occupied with adequate regard for environmental and public safety in accordance with Policy CS NPPF of the Local Plan Core Strategy DPD (adopted September 2012), DM04 of the Development Management Policies DPD (adopted September 2012), the Sustainable Design and Construction SPD (adopted October 2016) and 5.21 of the London Plan 2016.
