

Barnet Integrated Care Partnership (ICP)

Summary of the journey so far

July 2020

The Barnet ICP

- The ICP's vision is ***to maximise health and wellbeing for all people of Barnet by working together as an integrated care partnership.***
- The aims and objectives of the ICP cut across commissioning, public health, primary, community, mental health, acute, social care and the voluntary sector
- The four main aims are to :
 - Population health management approach that takes in to consideration the wider determinants of health and improves the health outcomes for residents of Barnet;
 - Addressing the challenging commissioning issues so that as a system we develop integrated solutions;
 - Addressing performance issues where Barnet is an outlier (e.g. by reducing the number of avoidable unplanned hospital visits and admissions)
 - Support residents in self-care and prevention;

Barnet ICP Progress to date

Developed strong collaborative system leadership

- Identified system leaders across multi-organisations in Barnet
- Held 'Integreat' workshops and informal meetings last year to build relationships
- Held detailed discussions about vision, outcomes, governance and financial management of the Barnet ICP to develop shared understanding

Developed joint governance

- Developed interim governance arrangements
- Established the Barnet ICP Board and Barnet Integrated Care Delivery Board
- Agreed Terms of References and Memorandum of Understanding
- Established workstreams to progress ICP development

Developed high level outcome domains

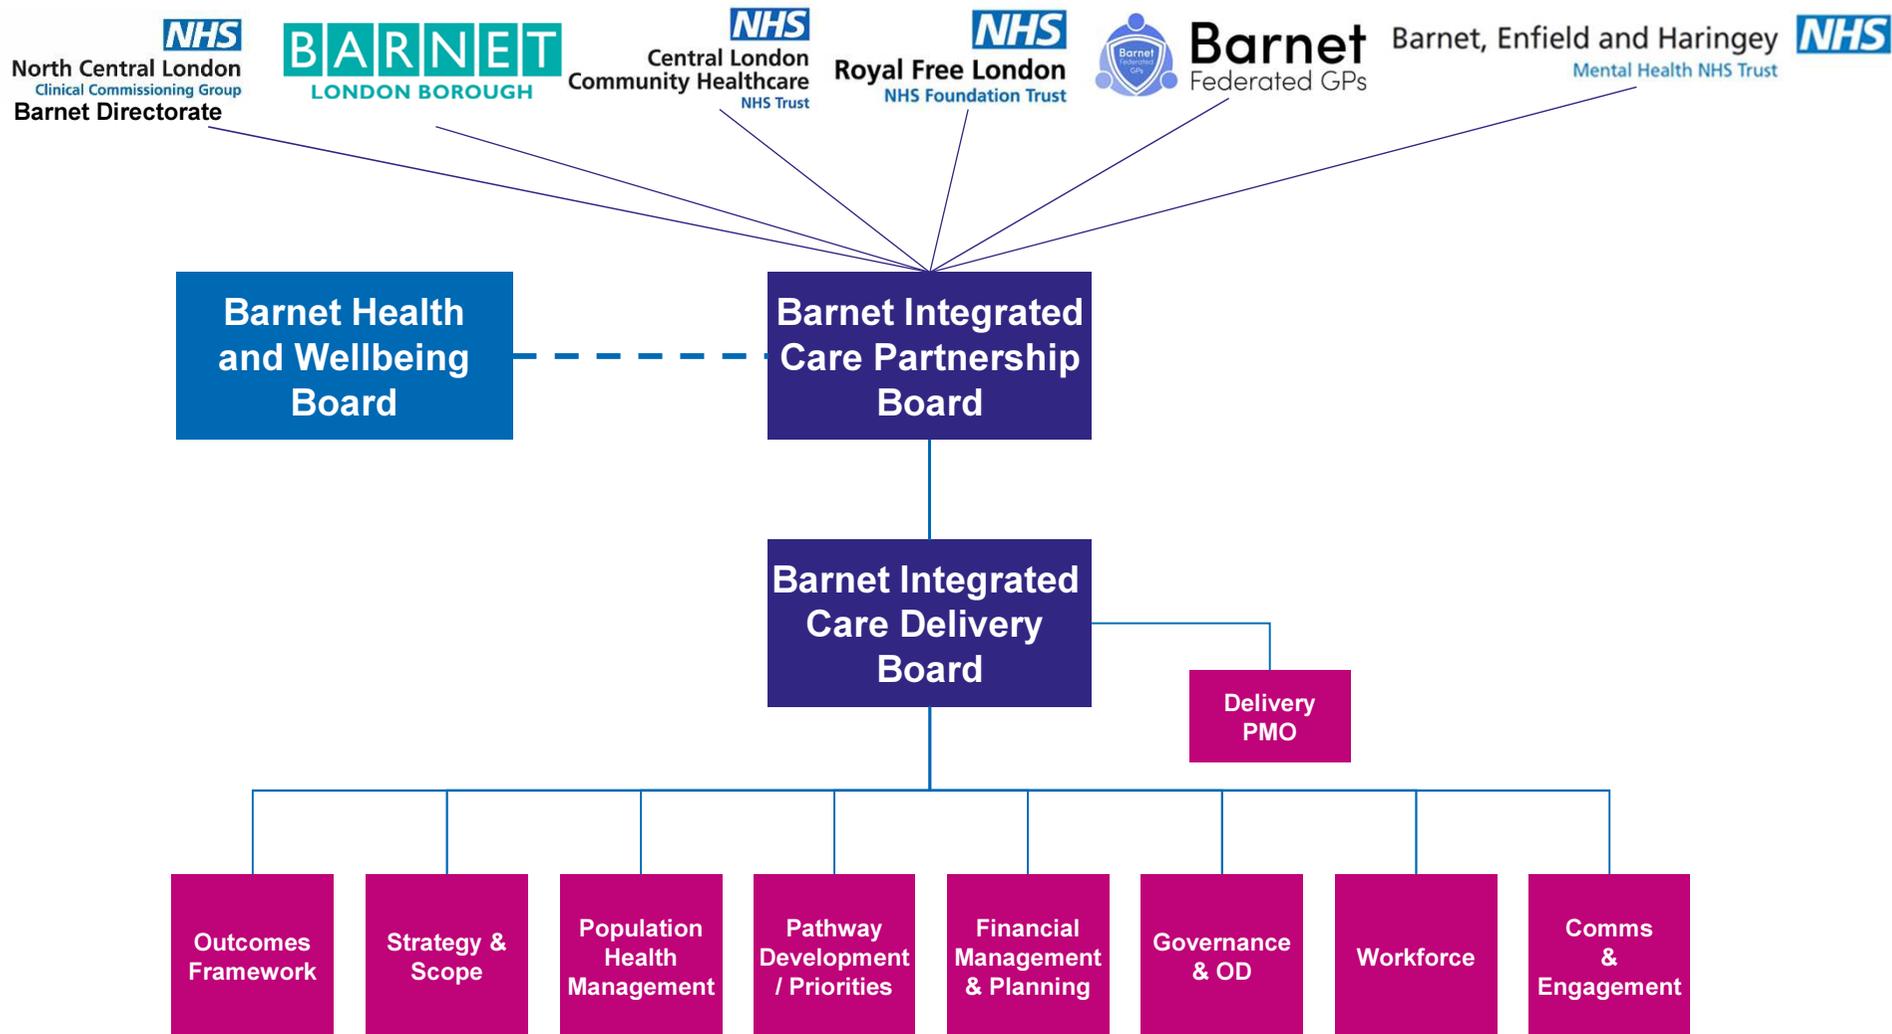

- Developed five high-level outcome domains around access, workforce, population health, wider determinants and community resilience
- Agreed an approach to develop detailed outcomes based on priority pathways

Identified areas to progress local integration

- Identified areas to progress integration, informed by the emerging outcomes, existing schemes, and areas of existing priorities and pressures for the local health and social care economy
- The areas were scaling up PCN proactive care for frailty and dementia; and increased investment in domiciliary care to support complex care, under the framework of an 'Ageing Well' model.

Refresh of ICP Priorities

Pre-Covid:

In January 2020, a paper setting out four high-level proposals to address system wide issues was presented at the RFL A&E Delivery Board, ICP Delivery Board and the Health and Wellbeing Board. The proposed projects were:

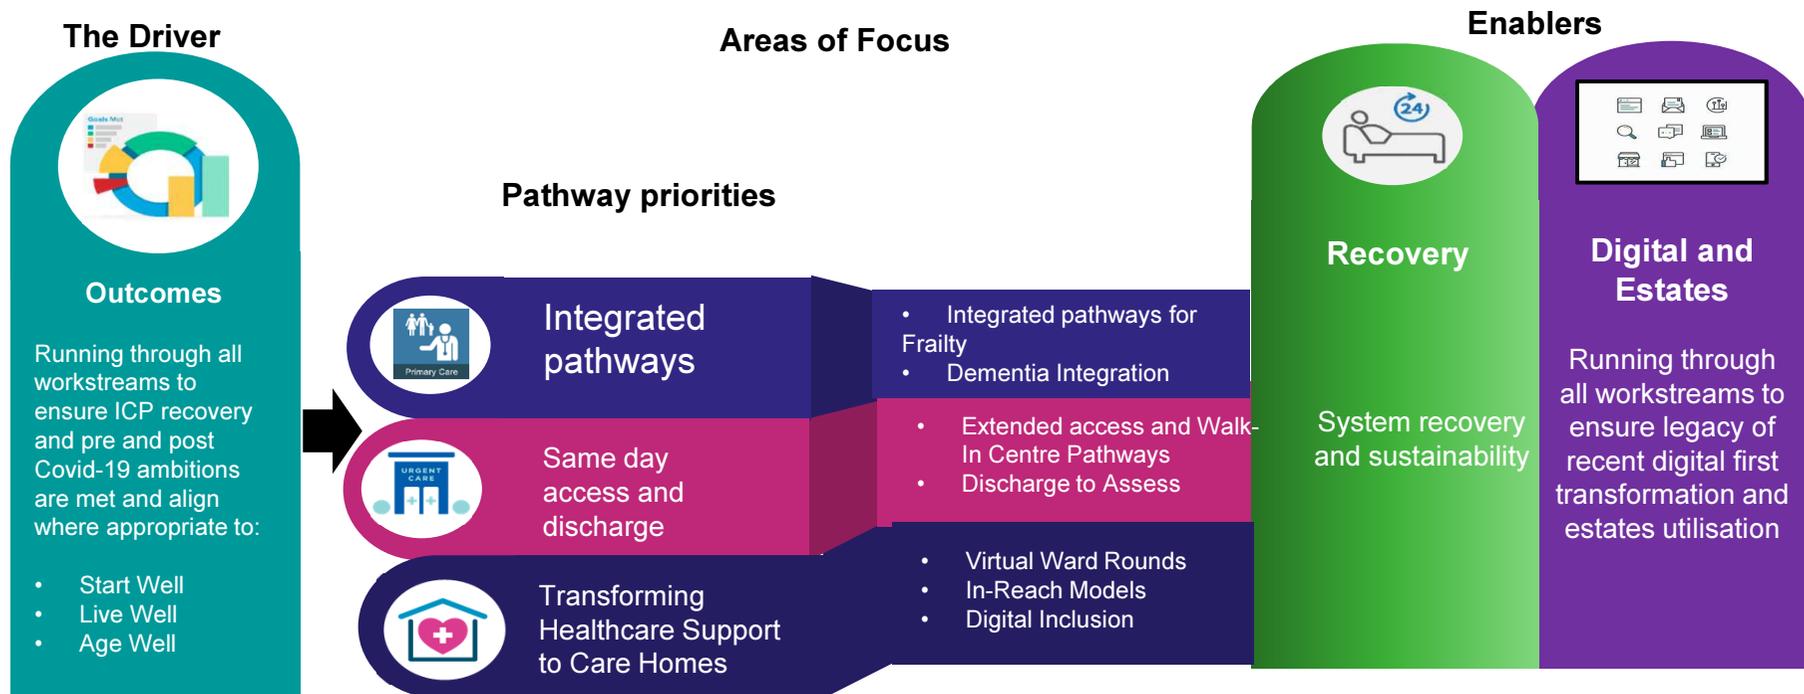

- Scale up Primary Care Network proactive care for **frailty and dementia**
- Lead provider for beds across the system
- Enhancement of **domiciliary care**
- Complex care in nursing homes
- Scale up of PCN support to frailty and dementia and a focus on complex domiciliary care were the areas both groups supported.

Since-Covid:

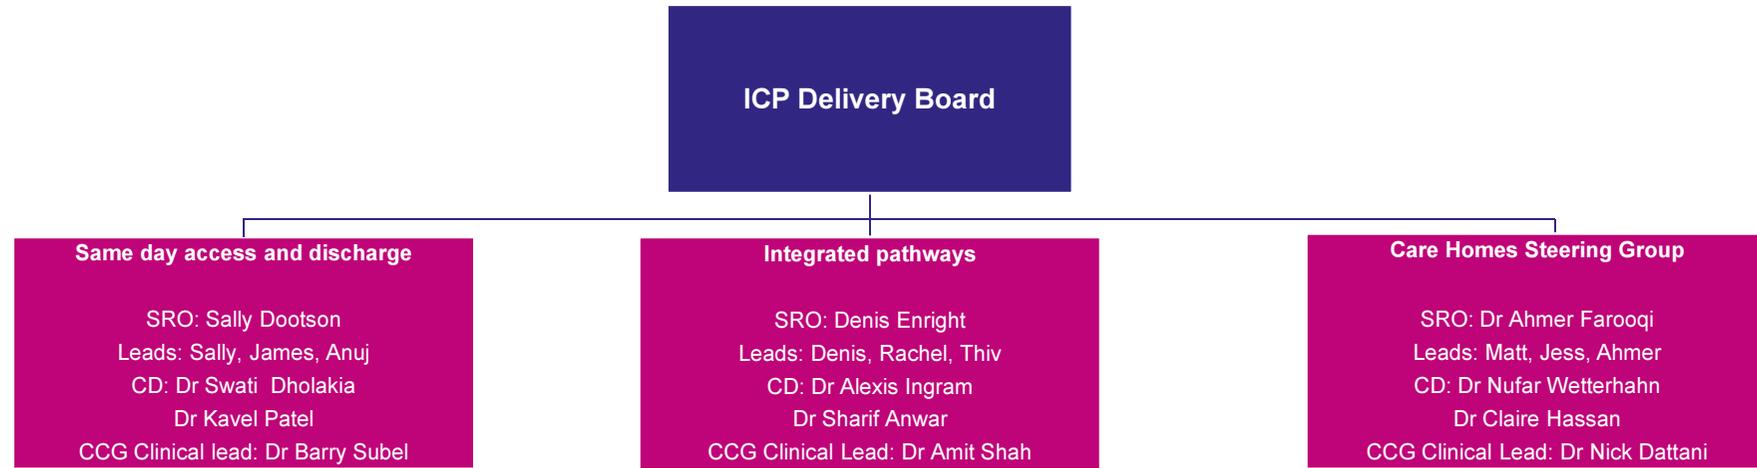

The pace and scale of changes have meant that the local system have worked together on a longer list of priority areas, which have included significant changes to:

- **Same day access** – through the ‘stand up’ of hot hubs, integration between community and primary care and significant changes to how urgent care is delivered the ICP will need to consider how we recover services and possible new delivery models. In addition, the ICP will need to consider discharge and flow in a way we have not before. Linked to this area is the possible continuation of the Integrated Discharge Team (IDT) at Barnet hospital with the need to consider how we prepare capacity to meet future demand for each of our discharge pathways, which includes **domiciliary care**.
- **Primary care networks (PCN)** – through the establishment of the community response local people have been shielded. How we deliver their proactive care going forward is an immediate concern, as is the delivery of outpatient and community specialist care to patients as practices group together into PCNs. This will include plans regarding **frailty and dementia**.
- **Care homes** – whilst an integral part of PCN working, care homes are a significant priority for Barnet. Work is well underway and is proposed to be overseen by the ICP.
